**PRO SERIES MULTI MODULAR SYSTEM** - The Pro Series units can operate stand alone or in in-line configuration with up to 4 modules. The MULTIFEEDER 6000 can be connected to: COMBI 1000, EMBOSSER 1000/2000, THERMAL 1000/2000, INSERTER 3000. The modular concept of the hardware with the easy-to-use MultiCard 2006 software makes of the PRO SERIES a unique scalable system for complete card personalization.

**FAST & FLEXIBLE** - The MULTIFEEDER 6000 makes multi-card processing simple, offering you complete flexibility and ease of use. With its 6 input hoppers, each capable of holding 200 cards, it allows random on demand feeding of up to 6 different card types.

**SMART & VERSATILE** - The MULTIFEEDER 6000 can be optionally equipped with a smart card encoding station for each of the 6 hoppers thus adding the power of smart card personalization.

**FAST AND FLEXIBLE:** The MULTIFEEDER 6000 makes multi-card processing simple, offering you complete flexibility and practicality with its 6 input hoppers capable of holding 200 cards each, for random on demand feeding of up to 6 different card types

**CONVENIENT AND VERSATILE:** The MULTIFEEDER 6000 can be optionally equipped with a chip encoding station each hopper for high speed smart card personalization
